

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH
----- FOR THE YEAR 1939. -----

WELSH BOARD OF HEALTH
RECEIVED

23 SEP 1940

A.

RHAYADER.

To:- The Chairman and Gentlemen
of the RHAYADER RURAL DISTRICT COUNCIL.

Gentlemen,

I have the honour to present to you the Report of the Medical Officer of Health for the year 1939.

Being an interim report this will deal only with urgent matters affecting the public health of the district.

During the last four months of the year the presence of a number of small children with their mothers, who came from some of the larger centres of population, led to increased demands on the Nursing Services and to more frequent meetings of the Infant Welfare Clinic. No serious outbreak of illness occurred amongst those evacuated to this part.

A number of cases of Infectious Disease were notified during the year. These included seven cases of Diphtheria and three of Scarlet Fever occurring amongst School Children. There was one case each of Puerperal Pyrexia, Influenzal Pneumonia and Erysipelas. One School was closed on three separate occasions on account of Scarlet Fever.

Amongst the deaths occurring during the year two were due to Influenzal Pneumonia, one to Influenza and one to Laryngeal Diphtheria.

TUBERCULOSIS:- New cases notified included two cases of Pulmonary Tuberculosis in males aged 30 and 37 years and one case in a female of 21 years. There was one case of Spinal Tuberculosis in a female child of four years.

Two deaths occurred during the year, one was a male of 56 years suffering from Pulmonary Tuberculosis, the other a male of 51 with Tuberculosis of Spine and Lungs.

I have the honour to be, Sirs,
Your obedient Servant,

14th:September 1940.

Signed:- H. T. LIPPIATT.
District M.O.H.

WESTERN BOARD OF HEALTH
RECEIVED

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH
FOR THE YEAR 1939.

RECEIVED

To: The Chairman and Gentlemen
of the KRAYABER RURAL DISTRICT COUNCIL.

Gentlemen,

I have the honour to present to you the Report of the

Medical Officer of Health for the year 1939.

Being an interim report this will deal only with urgent

matters affecting the public health of the district.

During the last four months of the year the presence of a

number of small children with their mothers, who came from some of the

larger centres of population, led to increased demands on the Nursing

Services and the more frequent meetings of the Infant Welfare Clinic.

No serious outbreak of illness occurred amongst those evacuated to

this part.

A number of cases of Infectious Diseases were notified during

the year. These included seven cases of Diphtheria and three of

Scarlet Fever occurring amongst School Children. There was one case

each of Puertal Pyrexia, Influenza Pneumonia and Typhoid.

One School was closed on three separate occasions on account of

Scarlet Fever.

Amongst the deaths occurring during the year two were due to

Influenza Pneumonia, one to Influenza and one to laryngeal Diphtheria.

TUBERCULOSIS: - New cases notified included two cases of Pulmonary

Tuberculosis in males aged 30 and 37 years and one case in a female of

31 years. There was one case of Spinal Tuberculosis in a female child

of four years.

Two deaths occurred during the year, one was a male of 36 years

suffering from Pulmonary Tuberculosis, the other a male of 31 with

Tuberculosis of Spine and Lungs.

I have the honour to be, Sirs,
Your obedient Servant,

Signed: M. T. LIPPIAT.
